

MYKHAILO KURYTSIA

Full Stack Developer

SKILLS

ASP.NET Core, .NET Framework, C#, Web API, Entity Framework, Angular, TypeScript, HTML5, CSS3, JavaScript, SQL Server, MySQL, Docker, Git, RESTful APIs, OAuth, JWT, Figma, ASP.NET Identity, Swagger, xUnit, Angular CLI, RxJS, NgRx, Bootstrap, REST API

EXPERIENCE

Internship Full Stack Developer

Developed several components for the Angular application, including dynamic forms and interactive tables with the ability to filter data.

Worked on ASP.NET Core-based API to support CRUD operations with SQL Server database.

Used Docker to containerize the application, ensuring uninterrupted operation in different environments.

Participated in code reviews and team meetings to plan new features and analyze technical solutions.

PET PROJECTS

“Personal doctor’s office”

Technologies: ASP.NET Web Api, AngularTs, JS, Jwt, MySQL, RxJs, SwiperJS, HTML/CSS, Figma, Entity Framework, Angular CLI, NgRx, REST API, Docker, xUnit.

Project goal: To save doctors from paperwork and improve their productivity. The app allows doctors to work with their patients from a computer or mobile app, so they are not tied to their office.

What I did: I have implemented the full functionality of the web application, and now I plan to implement artificial intelligence to quickly analyze patient symptoms and select a treatment approach, as well as improve the interface and optimize the code.

ABOUT ME

Full Stack developer with more than 3 months of commercial experience in developing web applications using .Net and Angular. I have deep knowledge of back-end development, RESTful APIs, microservices, and front-end development in Angular. I am looking for an opportunity to join a team, work on innovative projects and develop my skills.
